

June Rhomel Mandigma

FULL STACK DEVELOPER

+63 926 621 0532 | junemandigma@gmail.com | Batangas City, Philippines | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer with experience building responsive web and mobile applications, RESTful APIs, real-time features, authentication flows, and database-backed services. Strong focus on TypeScript, React ecosystems, Node.js, clean architecture, testing, performance, and translating business requirements into reliable user experiences.

CORE COMPETENCIES

- Responsive Web Design
 - Front-End Development
 - Debugging & Troubleshooting
 - Agile Collaboration
- Component-Based Architecture
 - REST API Integration
 - Performance Optimization
 - Cross-Browser Compatibility

PROFESSIONAL EXPERIENCE

Inventi Philippines | Full Stack Developer
Makati City, Metro Manila, Philippines | Remote

March 2023 - Present

- Develop reusable, responsive, and user-friendly systems for scalable web applications and microservices in an Agile environment.
- Build and maintain front-end and back-end functionality using React, TypeScript, Node.js, AWS services, SQL, and REST APIs.
- Collaborate with QA engineers, UX/UI designers, and stakeholders to translate business requirements into tested, production-ready solutions.
- Apply unit testing, debugging, Git-based version control, performance optimization, and cross-browser compatibility practices.

SELECTED PROJECTS

AmbagMo! | Full Stack Developer

Mobile shared-expense platform

Built a group expense and collection platform for tracking balances, receipts, payment QR codes, invite-based groups, and real-time activity across members.

TypeScript | React Native | Node.js | Express | MySQL | WebSocket | JWT | Google OAuth | Docker | Railway

Recivo | Full Stack Developer

Responsive receipt tracker

Built a responsive collection-receipt workflow with monthly target progress, receipt attachments, categorized summaries, authenticated access, and downloadable period reports.

TypeScript | Next.js | Node.js | Express | JWT | Google OAuth | Docker | Railway | Git

TECHNICAL SKILLS

FRONT END	TypeScript, JavaScript, React.js, React Native, Next.js, HTML, CSS, responsive design
BACK END	Node.js, Express, PHP, REST APIs, WebSocket, JWT, Google OAuth
DATA & CLOUD	MySQL, SQL, Redis, AWS Services, Docker, Railway
QUALITY & TOOLS	Jest, Git, Agile delivery, debugging, performance optimization, AI Engineering

EDUCATION & CERTIFICATION

Bachelor of Information Technology
Full-Stack Web Development Course - 6 weeks

St. Bridget College
KodeGo
